

Telegram Trading Bots: Setup & Monetization Guide

Time to apply: ~15 minutes

Target audience: Beginner-to-advanced traders

Theme: Automation, affiliate monetization, fast market alerts

Asset ID: 007

1. What Are Telegram Trading Bots?

Telegram trading bots are automated tools that send you real-time trade setups, alerts or even auto-execute trades — all inside your Telegram app.

You can:

- Receive scalping or swing signals instantly
 - Monitor multiple pairs or assets
 - Automate entries (if connected to APIs)
 - Build paid VIP channels (for monetization)
-

2. Setup in Under 5 Minutes

1. **Install Telegram** if you haven't: telegram.org
 2. Search and join signal groups like:
 - @SmartForexSignals
 - @CryptoSniperBot
 - @TradeXVIP
 3. Create your own bot (optional):
 - Message @BotFather
 - Use /newbot to create one
 - Copy the API Token
-

3. Best Bots to Follow Right Now

- Virtuals AI Signals Bot – Forex, Crypto & Gold
- TradeXP Bot – London Breakouts, scalping signals
- BitQuant Alpha – BTC/ETH focused

All bots are free to start. Upgrade options often include VIP groups.

4. Monetize With Zero Code

Want to **profit from signals** instead of just following them?

Start a bot → link your **affiliate URL** inside it.

Example:

Take this signal with 0% fees via our broker:
👉 [Bybit](#)

Tips:

- Use botfather + Manybot to automate replies
 - Promote via YouTube Shorts or TikTok using screen recordings
 - Collect emails for upsell using [Buttondown](#)
-

5. Pro Strategy: Combine Bots + Broadcast Channel

Create this combo:

- Telegram Channel (public)
- Bot that posts signals (via webhook or manual)
- CTA to affiliate link or VIP subscription

Make it look like:

BTCUSD SHORT @ 27,130
TP1: 26,900 | TP2: 26,500
SL: 27,400
Copy via: [Bybit](#)

You can earn \$50–\$200 per active user via affiliate programs.
